CONTENTS TO VOLUME 56

Computational physics	*Issue*	*Page*
Hey, A.J.G. The role of MIMD arrays of transputers in computational physics	1	1
Huberman, B.A. Parallel computation	1	25
Koberle, R. Neural networks as content addressable memories and learining machines	1	43
Marshall, G. Monte Carlo methods for the solution of nonlinear partial differential equations	1	51
Slaets, J.F.W. and G. Travieso Parallel computing: a case study	1	63
Toussaint, D. Introduction to algorithms for Monte Carlo simulations and their application to QCD	1	69
Virasoro, M.A. Disordered models of the brain	1	93
Gils, H.J., D. Heck, J. Oehlschläger, G. Schatz, T. Thouw and A. Merkel A multi-transputer system for parallel Monte Carlo simulation of extensive air showers	2	105
Thyagaraja, A. and D.F. Fletcher The nonhyperbolicity of multiphase flow equations: a nonlinear nonproblem?	2	115
Morales, J.J., L.F. Rull and S. Toxvaerd Efficiency test of the traditional MD and the link-cell methods	2	129
Aiello, G.R., M. Budinich and E. Milotti Hardware implementation of a GFSR pseudo-random number generator	2	135
Aiello, G.R., M. Budinich and E. Milotti A parallel processor for the simulation of Ising spin systems	2	141
Brody, T.A. Random-number generation for parallel processors	2	147
Würtz, D. and G. Hartung Neural computing on a system of parallel organized transputers: software implementation and hardware configuration	2	155
Denby, B. and S.L. Linn Spatial pattern recognition in a high energy particle detector using a neural network algorithm	3	293
Humpert, B. On the use of neural networks in high energy physics experiments	3	299

Computational physics (continued)	*Issue*	*Page*
Amini, M. and D. Fincham Evaluation of temperature in molecular dynamics simulation	3	313
Barlow, R. and P. Hinde Fitting the ratio of two distributions	3	325
Computer programs in physics		
Vrba, V. The Monte Carlo integration of cylindrical phase-space with leading particles	2	165
Falck, N.K., D. Graudenz and G. Kramer Cross section for five-parton production in e^+e^- annihilation	2	181
Vertes, P. FEDMIX: neutron transmission functions and lumped averaged cross-sections from standarized evaluated neutron data	2	199
Srinivasa Rao, K., V. Rajeswari and C.B. Chiu A new Fortran program for the 9-j angular momentum coefficient	2	231
Davidson, D.B. and D.A. McNamara A boundary element program package for electromagnetic excitation of conducting bodies of revolution by an asymmetrical slot	2	249
MacFarlane, J.J. IONMIX – a code for computing the equation of state and radiative properties of LTE and non-LTE plasmas	2	259
Draayer, J.P., Y. Leschber, S.C. Park and R. Lopez Representations of U(3) in U(N)	2	279
Stuart, R.G. and A. Góngora-T. Algebraic reduction of one-loop Feynman diagrams to scalar integrals. II	3	337
Jadach, S. and B.F.L. Ward YFS2 – The second-order Monte Carlo program for fermion pair production at LEP/SLC, with the initial state radiation of two hard and multiple soft photons	3	351
Perlt, H., J. Ranft and J. Heinrich Calculation of QED graphs with the spinor technique	3	385
Cash, J.R., A.D. Raptis and T.E. Simos A Fortran program for the numerical integration of the one-dimensional Schrödinger equation using exponential and Bessel fitting methods	3	391
Thyagaraja, A. Book review	2	291
Fincham, D. Bookreview	3	409
